SUMMARY

Digital platform and content operations leader with 15+ years of experience across intranets, websites, email platforms, UX, content management, analytics, and cross-functional digital programs. Experienced at partnering with communications, design, development, IT, and analytics teams to improve content accessibility, engagement, governance, and user experience across digital ecosystems. Skilled at building documentation, training resources, templates, and scalable processes that help distributed teams deliver consistent, user-focused digital experiences.

EXPERIENCE

Senior Graphic Designer – Email Marketing, Digital Content Operations | Listrak, Lititz, PA/Remote June 2019 - March 2026

- Led cross-functional collaboration with product, design, engineering, analytics, and client-facing teams to deliver high-performing, data-informed digital programs across complex email and SMS platforms.
- Partnered with stakeholders to translate brand standards, audience needs, content requirements, and technical constraints into scalable digital experiences.
- Developed personalization strategies using segmentation, dynamic content, and automated workflows to deliver relevant content throughout the customer journey, boosting open and conversion rates by an average of 20%.
- Created internal and client-facing process documentation, training guides, templates, and best-practice frameworks that improved content consistency, campaign execution, governance, and cross-team adoption.
- Supported content lifecycle management by helping teams plan, build, test, optimize, and maintain digital communications across automated and recurring campaign programs.
- Applied AI, analytics, and predictive tools to optimize send time, content recommendations, audience targeting, and campaign performance.
- Mentored junior marketers and designers, improving execution speed, creative consistency, technical accuracy, and data fluency across campaign deliverables.
- Localized, personalized, and optimized global email programs, adapting U.S.-based campaigns for Canadian, Mexican, Central American, and European markets to ensure cultural relevance, personalization accuracy, and lifecycle consistency across regions.

Web Designer and Front-End Developer | Self Employed, Oklahoma City, OK

November 2012 - June 2020

- Designed and built custom websites, landing pages, and brand-aligned digital experiences for businesses and non-profits.
- Managed the full creative and development lifecycle from concept to launch, including stakeholder discovery, responsive design, HTML/CSS development, testing, and deployment.

- Developed, deployed, and optimized email marketing campaigns for businesses and nonprofit organizations.
- Organized content and page layouts to improve usability, message clarity, and conversion paths across digital properties.

Front-End Developer | Clevyr, *Oklahoma City, OK*

July 2013 – May 2016

- Designed websites, web-based applications, and native mobile application interfaces for clients across a range of industries.
- Created front-end code in MEAN and LAMP stacks, partnering with back-end developers to deliver custom digital products.
- Translated client needs into usable digital interfaces, page structures and application experiences.
- Collaborated with technical teams to plan, build and refine web-based tools based on stakeholder requirements.

Adult Career Development Instructor | Francis Tuttle, *Oklahoma City, OK*

May 2010 – September 2014

- Taught industry-standard creative and technical skills, including Photoshop, Illustrator, Dreamweaver, web design, and Mac OS to adult learners.
- Developed curriculum, hands-on training materials, and structured learning experiences to support workforce readiness and career advancement.

Interactive Coordinator | Chesapeake Energy, *Oklahoma City, OK*

June 2010 - November 2012

- Managed digital communications across company and subsidiary platforms, including email campaigns, intranet updates, public-facing websites, SEO/SEM, and app support.
- Partnered with designers and developers to create, update, and maintain internal intranet content, improving usability and access to employee-facing information.
- Supported web and digital platform operations by coordinating content updates, promotional assets, stakeholder requests, and technical enhancements across internal and external channels.
